

LMB LO Light Oil Burner

Principais Características

- Burner with 2 or 3 levels of flame, with standard deflector (Mod. C) and long deflector (Mod. L);
- Indicated for pressurized boilers;
- Low level of polluting emissions;
- Combustion regulation by means of a shutter;
- Stabilized ventilation;
- Optimized combustion due to the uniform distribution of the air;
- Backlit LCD screen;
- Safety valve in models 1370 and 1976;
- Pump priming function and temporary stop of the burner;
- Power surge protection;
- Anomaly history;
- Total and partial hour counter of the various levels;
- Fuel consumption record;
- Flame intensity signal function;
- Adjustable post-ventilation period;
- Control and regulation panel that allows visualization of the operation status, error codes and block;
- Electrical protection IP X4D.

Descrição do Produto

Domestic diesel burner with 2 or 3 levels of flame, with powers of 105 to 1976kW.
