

Stainless Steel CLASSIC Thermosiphon

150 to 300 L

Principais Características

- Bowl and exchanger in stainless steel AISI 444
- High density thermal insulation of injected polyurethane rigid foam
- Exterior coating in stainless steel sheet
- Internal coil exchanger (horizontal)

Descrição do Produto

With the objective of increasing the quality, Zantia presents a range of solar water heaters in stainless steel AISI 444 produced with high-tech equipment in order to ensure high quality and resistance. All water heaters include a backup electrical resistance with regulation thermostat and safety thermostat. Available with an internal exchanger and capacities of 150, 200 and 300 Liters.
