YORK NEO combi boiler

Wood and Pellets

Principais Caraterísticas

- Combined cycle operation (wood and pellets)
 - Boiler body in sheet steel;
 - Modulating fan with 6 speed levels;
 - Automatic ignition;
 - Hourly programming (daily or weekly);
 - Large capacity silo with 85 kg of pellets;
- TOUCH electronic control panel with LCD screen;
 - Easy installation, use and maintenance;
 - Large fuel chamber, good resistance to condensation;
 - 3 operating modes: Firewood, Pellets or Combi);
 - Transport on site by pallet truck;
 - Includes tools for cleaning; A.Q.S.(Optional, equipment not included)

Descrição do Produto

New Combi Boiler (**wood and pellets**), designed for use with hourly programming, automatic ignition allowing the consumption of the most economically profitable fuel. Energy Class A+ and ECODESIGN 2022, which translates into high-performance equipment with low energy consumption. Made from high quality sheet steel, with a nominal thermal power of 35 kW.
Installation Recommendations: AISI 316 L stainless steel anti-condensation valve and chimney.
