

AURA Pellet Stove

Aquecimento Ambiente

Principais Caraterísticas

- Steel Structure
- Cast iron burner
- Display with digital control
- Weekly shedule
- Automatic operation
- Adjustable feet

Descrição do Produto

Pellet air stove for room heating. Thermal power of 9.55 kw, the most economical way to heat your home

Available Versions :

- Steel panel (White)

Note: after the good reception of the equipment by the customer, the glass is excluded from warranty.

Modelos e Preços

Código	Modelo
0603-0601	Air pellet stove AURA (White)

TECHNICAL DATA	AURA
Minimum /Maximum thermal power (kW)	4,45 / 9,55
Thermal Power Convention and Minimum/ Maximum Radiation (kW)	4,2 / 8,33
Minimum / Maximum Power Output (%)	94,39 / 87,22
Minimum/Maximum heated volume (m³)	120 / 238
Minimum / Maximum Hourly consumption (kg/h)	0,92 / 1,97
Minimum / Maximum autonomy (h)	7 / 15
Power supply (V/Hz)	230/50
Nominal Electric consumption (W)	80
Deposit capacity (kg)	14
Minimum Draft of the Chimney (Pa)	10
Air admission tube (mm)	40
Chimney diameter (mm)	80
Weight (kg)	82
Combustible	Pellet Ø6mm
